REVIEW AND CONSIDER A REQUEST TO APPROVE THE FINDING THAT THERE IS ONLY A SINGLE SOURCE FOR WATER FILTRATION MEMBRANES WITHIN A REASONABLE GEOGRAPHICAL AREA

Review and consider approving the finding that there is only a single source for water filtration membranes within a reasonable geographical area.

The water filtration plant employs membrane filters in the process of potable water. The membranes were purchases from Zenon Corporation, a firm since acquired by GE Water & Process Technologies. The membranes are of a unique and proprietary nature, utilizing a structural enhancement that allows the membrane to operate under suction rather than pressure. As a proprietary membrane, there are no alternative sources.

1. There is a single source for the water filtration membranes within a reasonable geographical area;
2. Competition through competitive sealed bidding is not feasible;
3. It is in the best interest of the city to attempt to acquire the water filtration membranes from GE Water & Process Technologies through noncompetitive negotiations as provided in KRS 45A.380;
4. The anticipated costs will be less than the amount budgeted for the replacement membranes in the City's current budget.

7. At the time of harvest, or as soon as practicable thereafter, in consideration for use of the Reservoir, Aquila shall pay to the City, a sum of money equal to twenty percent of the Ex-Vessel Value of the catch;
8. Catch shares shall be paid within 30 days of sale;

9. Aquila agrees that it shall be, and is responsible for, the safety of its partners and other personnel that are utilizing, and present on City's property, and Aquila agrees to indemnify, hold harmless, and defend City and all of its officers, departments, agencies, and employees from and against all claims, demands, actions, suits, damages, fines, penalties, liabilities, losses, settlements, judgments, costs and expenses, resulting from, arising out of, or in any way connected to injury caused by Aquila's use of the Reservoir pursuant to this contract;
